About Us

S-Tech Automation Systems was established in 2014 with the goal of providing prompt and affordable solutions to our esteemed customers in Leakage Testing applications, surpassing the conventional way of using the water dipping method. Our founders have a combined personal experience of more than 18 years in the field of Leakage & Flow Testing applications. The culmination of our control teams years of tenacious effort to satisfy the highest possible standard of measuring technology is our locally created leak testers and flow testers. Today, our manufacturer and supplier entity is known for offering HS 804 EL Differential Pressure Leak Tester, Vacuum Leak Tester, Functional Test Bench, Flow Tester and a lot more products.

We created unique solutions with high performance, greater accuracy, quick product delivery, and top-notch craftsmanship. Before manufacturing, our engineering team reviews the feasibility research, and our design team creates conceptual engineering drawings with the customers nod of approval. We have constructed every piece of machinery and manufacturing equipment needed to carry out our duty and deliver the finished product.
